

1. Write a C program to remove duplicate elements from an array.
2. Write a C program to find the minimum element in an array.
3. Write a C program to merge two arrays.
4. Write a C program to find the maximum element in an array.
5. Write a C program to Sum of even numbers in an array.
6. Write a C program to find the average of all elements in an array.
7. Write a C program to sort an array in descending order.
8. Write a C program to find the sum of all elements in an array.
9. Write a C program to find the second largest element in an array.
10. Write a C program to insert an element at a specific position in an array.
11. Write a C program to find the median of an array.
12. Write a C program to find the difference between two arrays.
13. Write a C program to sort an array in ascending order.
14. Write a C program to count the total number of even elements in an array.
15. Write a C program to sort an array in ascending order.
16. Write a C program to find the range of an array.
17. Write a C program to count the total number of negative elements in an array.
18. Write a C program to print all negative elements in an array.
19. Write a C program to find the second smallest element in an array.
20. Write a C program to copy all elements from an array to another array.
21. Write a C program to find the sum of 10 integers using an array.
22. Write a C program to remove an element from an array at a specified position.
23. Write a C program to check if an array is sorted in ascending order.
24. Write a C program to check if an array is sorted in descending order.
25. Write a C program to find the maximum sum of an increasing subarray in an array.
26. Write a C program to find the maximum sum of a circular subarray in an array.
27. Write a C program to find the length of the longest increasing subarray in an array.
28. Write a C program to find the length of the longest decreasing subarray in an array.
29. Write a C program to find the common elements between two arrays.
30. Write a C program to reverse an array.
31. Write a C program to get input and print elements of an array.
32. Write a C program to count the total number of odd elements in an array.
33. Write a C program to merge two arrays and sort the merged array.
34. Write a C program to check if two arrays are equal.
35. Write a C program to find the smallest missing positive number in an unsorted array.
36. Write a C program to calculate the product of all elements in an array.
37. Write a C program to compare two arrays.
38. Write a C program to sort an array in descending order and find the sum of the first and last elements.
39. Write a C program to find the sum of all elements in an array.
